Coronavirus rules in Munich

Federal and state governments have decided on a plan to relax coronavirus restrictions step by step. Each step is linked to the 7-day incidence rate falling below a certain value. The 7-day incidence rate is the number of new coronavirus infections per 100,000 inhabitants within the last 7 days.

Currently, the rules for incidence rates below 50 apply in Munich.

If the 7-day incidence rate rises above 50 or 100 again, different rules may come into force.

You can obtain the **current 7-day incidence** rate on the Capital City of Munich's official internet portal. www.muenchen.de/rathaus/Stadinfos/Coronavirus-Fallzahlen.html

The Bavarian State Ministry for Health and Care Services provides up to date information on the regulations currently in force. www.stmgp.bayern.de/coronavirus

Compulsory face masks

Masks are no longer compulsory in the inner city.

FFP2 masks must still be worn everywhere in shops, medical practices, aged care and nursing homes, during religious services, as well as on all U-Bahn and S-Bahn trains, other trains, trams and buses.

Children between their 6th and 15th birthdays are only required to wear a face covering instead of an FFP2 mask. Children under 6 years old are not obliged to wear a mask.

Many people in need are given FFP2 masks free of charge. Please enquire at your group accommodation facility or at the Sozialbürgerhaus (citizen's social centre).

Social restrictions

Rules for private gatherings depend on the 7-day incidence rate.

The following applies for incidence rates below 50: Private gatherings of up to 10 persons are possible, independent of the number of households (or families) they belong to.

Persons who are fully vaccinated against the coronavirus and those who have recovered from COVID-19 are not subject to social contact restrictions and are therefore not counted.

Restrictions of movement

While the current incidence rate remains under 50, no curfew applies.

The prohibition of alcohol consumption in public places has been removed. Exceptions are the Gärtnerplatz and Wedekindplatz areas, where alcohol consumption is prohibited between 8 pm and 6 am.

Further information is available from the Bavarian State Ministry for the Interior. stmi.bayern.de/miniwebs/coronavirus/faq/

Visiting aged care and nursing homes

Visitors must wear an FFP2 mask.

For visitors who are fully vaccinated or have recovered from COVID-19, a medical mask is sufficient.

While the current incidence rate remains below 50, testing is no longer compulsory for visitors.

Attending to and supporting the dying is permitted at any time.

Fully vaccinated persons are

... exempt from social contact restrictions.

... do not have to be counted for private and family gatherings, or gatherings in public places.

Compulsory protective masks and social distancing rules continue to apply for vaccinated persons. It is important to always carry and be able to produce proof of vaccination status (vaccination passport, "Impfpass").

Gastronomy and beer gardens

Currently, the rules for incidence rates below 50 apply in Munich.

Gastronomic businesses may open indoor as well as outdoor spaces until midnight without compulsory testing for visitors.

Venues with bar services (drinks only) may only open outdoor spaces.

All guests must wear an FFP2 masks indoors, except while seated at a table.

Outdoor broadcast screenings: If you are visiting a beer garden or gastronomic venue with more than 1,000 persons, you need a negative PCR or point-of-care (POC) rapid antigen test result.

The test result must not be older than 24 hours at the start of the football game broadcast.

Persons who are fully vaccinated against the coronavirus or have recovered from COVID-19 do not have to get tested.

It is important to always carry and be able to produce proof of vaccination status (vaccination passport, "Impfpass").

Schools and child care

Child care: Child care centres and day care services (Kitas) open normally.

Schools: On the basis of the 'under 50' incidence rate threshold, full school attendance (Präsenzunterricht) is possible at all schools.

However, compulsory testing and masks apply, as does the minimum social distance of 1.5 meters.

Pupils must be able to provide written or electronic proof of a negative PCR or point-of-care (POC) antigen test result twice per week. The test may also be obtained at the school.

Alternating school attendance will again apply to all pupils if incidence rates rise to between 50 and 165.

You can obtain up-to-date information about school operations and current incidence rates on the City of Munich website at

www.muenchen.de/rathaus/Stadtverwaltung/Referat-fuer-Gesundheit-und-Umwelt/Infektionsschutz/Neuartiges_Coronavirus.html#Schule

The Bavarian State Ministry for Education and Culture offers general information about school operations for 2021 in a range of languages. www.km.bayern.de/allgemein/meldung/7011/informationen-zum-schuljahr-202021-in-anderen-sprachen.html

Face-to-face teaching is permitted at **universities**. However, compulsory testing and masks apply, as does the minimum social distance of 1.5 meters.

Music schools are open. **Driving schools** are open. Digital teaching services on the internet are possible.

Normal face-to-face teaching is possible for non-school-based **vocational and further education and training**, as well as in adult education.

Events and leisure activities

Please comply with the following rules:

- **Religious services:** These are permitted for all religions. Maintain a distance of at least 1.5 meters from other people. Wear an FFP2 mask, even when seated!
- **Demonstrations:** Maintain a distance of at least 1.5 meters from other people. Wear a suitable protective mask (FFP2 indoors).
- **Private events:** While incidence rates are under 50, private events are permitted for special occasions. This applies, for example, to birthdays, weddings and christenings, as well as to association meetings. For these, no more than 100 people may gather outdoors and no more than 50 indoors. Persons who are fully vaccinated against the coronavirus and those who have recovered from COVID-19 are not subject to these social contact restrictions and are therefore not counted.
- **Outdoor cultural events:** Audiences of up to 500 are permitted with allocated seating.
- **Cultural institutions:** While incidence rates are under 50, museums, exhibitions and memorial sites remain open. Audiences are permitted in theatres, opera theatres, other stage venues and cinemas. All audience members must register for the purposes of contact tracing. Libraries, archives and lending libraries are open for lending. The Munich adult education institute (Volkshochschule) is offering in-person classes again.

- **Leisure facilities:** While incidence rates are under 50, these may be visited without compulsory testing. Currently open are e.g. zoos and botanic gardens, leisure parks, indoor playgrounds and similar fixed leisure facilities, as well as public and hotel swimming pools, spas, wellness centres, saunas and solariums. Gaming venues, casinos and betting offices are also open.
- **Sports facilities:** Sports facilities and gyms are open. However, the number of visitors is restricted. Recreational sports are permitted outdoors and indoors without group size limitations or compulsory testing.
- **Outdoor sports events:** Up to 500 spectators are permitted with allocated seating.
- **UEFA EURO 2021:** For the four games of the European Football Championship to be played at the Munich Football Arena, spectator numbers are limited to 14,000 (20 percent of total capacity) per game.
- **Outdoor broadcast screenings:** If you are visiting a beer garden or gastronomic venue with more than 1,000 persons, you need a negative PCR or point-of-care (POC) rapid antigen test result. The test result must not be older than 24 hours at the start of the football game broadcast. Persons who are fully vaccinated against the coronavirus or have recovered from COVID-19 do not have to get tested. It is important to always carry and be able to produce proof of vaccination status (vaccination passport, "Impfpass").
- **Tourism:** Overnight accommodation services for touristic reasons have resumed in Munich on 21st May. Touristic city sightseeing and guided tours are permitted.
- **Nightclubs and discos:** These types of venues remain closed.
- **Trade fairs:** These are not taking place.
- **Conferences and meetings:** These may be held with appropriate infection control concepts in place.
- **Sexual services venues:** These remain closed.

Further information is available from the Bavarian Ministry for the Interior.
www.corona-katastrophenschutz.bayern.de

Shops and services

Currently, the rules for incidence rates below 50 apply in Munich.

While incidence rates remain under 50, shops open normally.

Customer numbers are limited in shops.

Personal and body care services have reopened. The offices of Munich City Council administration are mostly accessible. You must always wear a suitable protective mask on City Council premises. Maintain a distance of at least 1.5 meters from other people.

Crowding should be avoided on Council premises to protect from infection.

With the corona alert app (Corona-Warn-App), you can be informed anonymously and quickly if you have been in the vicinity of an infected person.

The app is available for download free of charge from the app store or from Google Play.

Testing options/contact with infected persons

If you are attending a medical practice or testing centre, you must wear an FFP2 mask.

Maintain a distance of at least 1.5 meters from other people.

What you need to know about coronavirus testing in the **City of Munich**:

- **Coronavirus testing** is available in medical practices. Persons with symptoms (signs of illness) such as fever, cough, or shortness of breath can obtain testing at their doctor's practice.

Testing is also available to persons without health insurance. You must make an appointment by phone ahead of time. Then you can attend the medical practice.

Don't forget your FFP2 mask and your health insurance card!

You can find medical practices on the internet at 'Arztsuche für Coronavirus-Test'.

<https://dienste.kvb.de/arztsuche/app/such-ergebnisse.htm?hashwert=a126d5d04b692b-87be6ccbe3b2717826&lat=48.1351253&lng=11.5819805&zeigeKarte=true>

- **If the coronavirus warning app (Corona-Warn-App)** shows 'elevated risk' in red, please make an appointment at your doctor's practice by telephone.

- **The State Capital of Munich Testing Centre** on Theresienwiese offers coronavirus testing, whereby you attend in your own passenger vehicle without leaving the car ('drive through'). Testing is free of charge for Munich citizens. Bring a protective mask (FFP2), and your health insurance card if you have one.

Please only attend the testing centre after having made an appointment ahead of time. The appointment time will be confirmed by SMS and email. Please register on the internet with your mobile telephone number and your personal email address.

www.corona-testung.de

- **The "Bereitschaftspraxis Infekt"** on-call infectious disease service is also located on Theresienwiese (in the Behördenhof, Matthias-Pschorr-Straße 4).

Patients may attend with no appointment needed. Please bring an FFP2 mask, and your health insurance card if you have one. Open seven days per week:

Monday, Tuesday and Thursday from 6pm to 9pm, Wednesday and Friday from 4pm to 9pm, Saturday, Sunday and public holidays from 10am to 9pm.

- **Rapid testing:** As part of 'citizen testing' ('Bürger-testungen'), each person may access at least one rapid antigen test per week free of charge.

These rapid tests are available in pharmacies intended for this purpose, and at private testing centres.

To find out where you can get a rapid test, go to: www.testen-muenchen.de

Rules applicable in case of a positive test result

If you receive a positive test result, you must isolate immediately (quarantine) and undergo a PCR test. Please make a testing appointment without delay.

Quarantine ends only with submission of a negative PCR test result. If this test result is also positive, you must inform the Office of Public Health (Gesundheitsamt) immediately.

Contact details for the Office of Public Health (Gesundheitsamt):

Ph. 089 233 96333

Email: infektionsschutz.gsr@muenchen.de

As a contact of an infected person (KP 1), you must remain in home quarantine for 14 days. To leave quarantine, you must produce a negative test result.

Travel regulations

Please comply with all regulations and obligations when you enter Germany from a risk area, high incidence area or an area with coronavirus variants:

You can find a list of risk areas on the internet.

[www.rki.de/DE/Content/InfAZ/N/](http://www.rki.de/DE/Content/InfAZ/N/Neuartiges_Coronavirus/Risikogebiete_neu.html)

[Neuartiges Coronavirus/Risikogebiete_neu.html](http://www.rki.de/DE/Content/InfAZ/N/Neuartiges_Coronavirus/Risikogebiete_neu.html)

- Air passengers are obliged to test before departing for Germany. Transport companies are only permitted to transport passengers with proof of a negative PCR test result.
- If you enter Germany from a risk area, you must complete an arrivals form on the internet before arrival in Germany. You then receive a confirmation document (PDF).
You can fill in the arrivals form online.
www.einreiseanmeldung.de/#/register
- If you are returning from a **risk area** and are not vaccinated, you must provide proof of a negative test result or enter home quarantine.
If you are returning from a **high incidence area**, you must stay in home quarantine for 5 days. Quarantine only ends when you are able to provide proof of a negative test result at the end of the five days.
If you have spent time in a risk or high incidence area, please send your proof of test result by email to corona-einreisende.gsr@muenchen.de
- If you have arrived from a **virus variant area**, you must immediately enter home quarantine for 14 days. The quarantine period cannot be shortened.
If you have entered Germany from a virus variant area, please send your proof of test result by email to virusvarianten-gebiete.gsr@muenchen.de

- Exceptions to compulsory quarantine apply in certain cases. The Federal Department of Health provides information on this in many languages.
www.bundesgesundheitsministerium.de/coronavirus-infos-reisende/merkblatt-dea.html
- If typical symptoms (signs of illness) of SARS-CoV-2 coronavirus infection appear within ten days of arrival, a coronavirus test must be performed. You must attend a medical practice or testing centre to obtain the test. Typical symptoms include cough, fever, runny nose and loss of the sense of taste and smell.
- A temporary transportation (flights, trains, buses, ships) and entry ban for Germany applies to travellers from countries with severe spread of particularly infectious variants of the coronavirus (coronavirus variant risk areas). It applies to air, rail, bus, maritime and all other traffic.
Several exceptions exist, e.g. for all German citizens and foreigners working in key occupations (systemrelevante Berufe) residing in Germany, as well on humanitarian grounds. A negative coronavirus test result must be produced on arrival.
- There is no compulsory testing for travellers returning from a **non-risk area** by car or train.

Further information is available from the Robert Koch Institute (RKI).

[www.rki.de/DE/Content/InfAZ/N/](http://www.rki.de/DE/Content/InfAZ/N/Neuartiges_Coronavirus/Risikogebiete_neu.html)

[Neuartiges Coronavirus/Risikogebiete_neu.html](http://www.rki.de/DE/Content/InfAZ/N/Neuartiges_Coronavirus/Risikogebiete_neu.html)

Rules for fully vaccinated persons

Persons who have been fully vaccinated with a vaccine approved for use in the European Union, and who can provide proof of their vaccination status in German, English or French, are exempted from compulsory quarantine after having spent time in a risk area.

The same applies to persons who have verifiably been infected or have been ill with SARS-CoV-2 (shown by positive PCR test) and have recovered fully. The positive PCR test is valid as proof from 28 days to 6 months after the test date. Only one dose of vaccination is required afterwards in order to be considered fully vaccinated.

This exception only applies if and insofar as the affected person does not show any symptoms indicating SARS-CoV-2 infection, and is always carrying proof of their vaccination status.

This exception for vaccinated persons does **not** apply after having spent time in a virus variant area.

Vaccination in Munich

Vaccination is voluntary and free of charge.

The capital city of Munich is making great efforts to provide all citizens with access to vaccination against the coronavirus.

Children and adolescents under 16 years of age are not yet being vaccinated. This does not apply to children and adolescents with certain pre-existing health conditions. Please ask your doctor or an information service for details.

You can register for a coronavirus vaccination on the internet. To register for the coronavirus vaccination, please use the internet pages of the Bavarian vaccination centres at impfzentren.bayern

You will receive your vaccination appointment information by email.

When registering for vaccination, please ask someone who speaks German well to help you. If you are, for example, unwell or live in a group accommodation facility, you may be able to get an earlier appointment.

Vaccination will take place at the vaccination centre located at the Riem trade exhibition centre. You can reach it by U-Bahn.

After being vaccinated at the vaccination centre, please do not delete your registration with the Bavarian vaccination portal (BayIMCO). It will be needed for your digital vaccination passport later.

If you live in an accommodation facility for asylum seekers, you may be vaccinated at the facility. Please enquire with the staff at the facility.

Registered users of the Münchner Tafel foodbank may enquire at the Münchner Tafel about vaccination.

Please ensure you bring your vaccination appointment confirmation to the vaccination centre with you.

If you have a vaccination passport (Impfpass), you must bring it with you as well.

Since April, general practitioners have also been providing vaccination. You must arrange your own appointment to be vaccinated there. You can register on a waiting list in most practices.

The City has put in place a **vaccination telephone line**. Munich residents without access to the internet or an email address can register there.

Ph. 089 90429-2222

Germany-wide vaccination information

Current information on the COVID-19 vaccination with an mRNA vaccine is available in many languages from the Robert Koch Institute (RKI): www.rki.de/DE/Content/Infekt/Impfen/Materialien/COVID-19-Aufklaerungsbogen-Tab.html
